## ABOUT ME

front-end-developer (ReactJS), 1 year of experience Working on multinational company using React/Next.JS . optimizing web design for smartphones. balance functional design with esthetic design. use a variety of accent languages to write web pages. and I keep my skills updated and learning Modern technologies to make the website more interactive with users.

## WORK EXPERIENCE

**Software engineer (junior front-end) at StackZy** (march 2022) - present

Main Project:- <https://11s.deploystage.com/>  
Eleven Stats is the future of data analytics for football (soccer) fans. We help reduce the barrier for entry into professional-level data by making it affordable for the average fan, contributing towards the democratization of data in the sport

### Role Responsibilities:

- Working with UI/UX team to Translate Figma design to code
- Working with Backend team to integrate the design with API.
- Working with Redux & ReduxToolkit as state management.
- Testing and maintain the code to avoid and resolve bugs.
- Fix bugs (design - functionality) in the project.
- Implement Next.js features like SSR and SSG to website pages .
- Build project using TypeScript and refactor old code and convert it to TypeScript.
- Working on Linux OS.
- Collaborate with the back-end team for integration
- Discuss with the team about the difficult problems and how to fix them.

Technology:- HTML , CSS , React.js , Redux.js , MUI5 , Linux , TypeScript , JavaScript , ReduxToolkit , AmCharts 5 , Next.js
