👤 PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience building scalable web applications and micro-frontend architectures. Skilled in delivering high-quality services, creating reusable components, and collaborating with cross-functional teams to translate business needs into seamless user experiences. Seeking a Frontend Engineer (React) role to build dynamic, high-performance interfaces.

📁 EMPLOYMENT HISTORY

Watania Solutions Co. 📍

Frontend Developer (React)

02/2023 – present
Al Duqqi - Giza, Egypt

Saudi Authority for Intellectual Property (SAIP):

- Built, managed, and maintained scalable **micro-frontend architectures**, ensuring modularity, reusability, and independent deployments.
- Developed and delivered core SAIP platforms including **Trademarks, Patents, and Industrial Design** modules.
- Designed and implemented a **shared assistive services repository** consumed across all SAIP modules to standardize functionality and reduce duplication.
- Delivered **25+ production-ready services** including payment flows, advanced search, and dynamic multi-step forms.
- Developed high-performance **landing pages** optimized for **accessibility (WCAG)**, SEO, and load speed.
- Built a complete **Agency Management Module** to handle agency registration and request workflows.
- Collaborated closely with **UX/UI designers and business stakeholders** to translate requirements into intuitive user experiences.

KLU :

- Enhanced existing codebases by identifying and resolving **complex bugs** in large-scale frontend applications.
- Refactored legacy JavaScript code and migrated it to **modern ES6+ standards**, improving readability and maintainability.
- Developed new features using **clean, reusable, and scalable components**.
- Provided technical support and guidance to other teams to unblock tasks and ensure delivery timelines.

TAHAQQ :

- Led the **Frontend Squad** from development phase through **successful production release**.
- Implemented new features with a strong focus on **performance, scalability, and clean architecture**.
- Designed and built **reusable component libraries** shared across multiple repositories.
- Debugged, refactored, and stabilized legacy codebases to meet **production-ready standards**.

Elevenstats:

- Developed the Elevenstats website providing comprehensive player data and statistics.
- Maintained the scouting page for player and league statistics.
- Created a chart page for comparing player statistics.
- Developed the player's profile page detailing stats, history, and team information.
- Refactored the home page for more efficient match updates via single interval API calls.
- Enhanced the Head-to-Head page for live scores and match histories
